Monitoring

The **Mobile Ambient Air Monitoring Laboratory (MAAML)** visited Magnolia Park/Pineview three times in January 2014. Pollutant levels detected are compared to the EPA's National Ambient Air Quality Standards (NAAQS). These standards are set for pollutants considered **harmful** to public health and the environment. **No** readings exceeded these standards. Environmental Investigators were also in Magnolia Park/Pineview five times during January 2014. Handheld monitors were used during two of these investigations. Readings were zero or below standards for both times. They did not observe any violations during their investigations. Ozone information for 2013 have been update below.

Magnolia Park Mobile Ambient Air Monitoring Laboratory (MAAML) deployments and Continuous Ambient Air Monitoring Stations

- The U. S. Environmental Protection Agency (EPA) sets the National Ambient Air Quality Standards (NAAQS).
- In the Houston region, during the 2011-2013 period, 15 of 20 Ozone active monitoring locations were in non compliance with the eight-hour Ozone NAAQS of 0.075 parts per million (ppm).
- In the surrounding area of the Magnolia Park super neighborhood, four Ozone monitoring locations were in non compliance: Houston East, Park Place, Houston Texas Avenue, and Clinton.
