Monitoring

The **Mobile Ambient Air Monitoring Laboratory (MAAML)** was deployed in South Park three times in January 2014. Pollutant levels detected are compared to the EPA's National Ambient Air Quality Standards (NAAQS). These standards are set for pollutants considered **harmful** to public health and the environment. **No** readings exceeded these standards. Environmental Investigators were also in South Park two times during January 2014. They did not observe any violations during their investigations. Ozone information for 2013 has been updated below.

South Park Mobile Ambient Air Monitoring Laboratory (MAAML) deployments and Continuous Ambient Air Monitoring Stations

- The U. S. Environmental Protection Agency (EPA) sets the National Ambient Air Quality Standards (NAAQS).
- In the Houston region, during the 2011-2013 period, 15 of 20 Ozone active monitoring locations were in non compliance with the eight-hour Ozone NAAQS of 0.075 parts per million (ppm).
- In the surrounding area of the South Park super neighborhood, three Ozone monitoring locations were in non compliance: Houston Monroe, Park Place, and Clinton.
