Ozone Season is here:

Learn what the different color indicators mean for your health.

Air Quality Index Values (ozone parts per billion)		Levels of Health Concern
>135	Hazardous:	Health alert: everyone may experience more serious health effects
116-135	Very Unhealthy:	Health warnings of emergency conditions. The entire population is more likely to be affected.
96-115	Unhealthy:	Everyone may begin to experience health effects; members of sensitive groups may experience more serious health effects.
77-95	Warning:	Members of sensitive groups may experience health effects. The general public is not likely to be affected.
61-76	Moderate:	Air quality is acceptable; however, for some pollutants there may be a moderate health concern for a very small number of people who are unusually sensitive to air pollution.
0-60	Good:	Air quality is considered satisfactory, and air pollution poses little or no risk.
