

# W.A. PARISH

LOCATED IN FORT BEND COUNTY  
DIRTIEST COAL PLANT IN TEXAS  
4TH DIRTIEST IN THE NATION

# ~178

PREMATURE DEATHS  
EVERY YEAR DUE TO  
POLLUTION

A Rice University study found that the Parish power facility is responsible for upwards of 178 premature deaths a year.

Parish is the **single worst air polluter** in the Houston gulf region, ranking 2nd worst statewide for Particulate Matter and Sulfur Dioxide pollution.

At least one of the four coal-burning **units have failed during key moments**, including: Record-breaking heat during the summer of 2022, Winter Storm Uri, and Hurricane Harvey.

61 of 64 groundwater monitoring **wells have been found to have unsafe levels of arsenic, mercury, and more.**

## NRG ENERGY, WE DEMAND CLEAN AIR AND WATER.

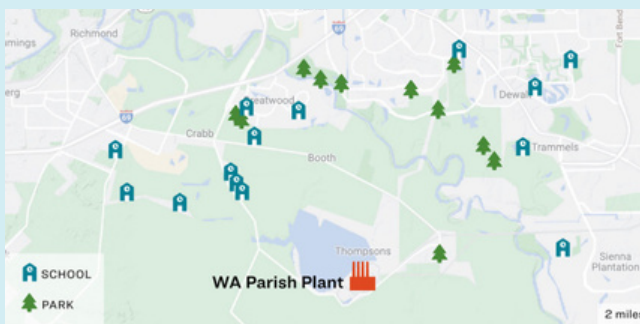

The #CloseParishCoal effort is for community and by community! Our goal is to hold NRG Energy accountable to clean air laws and to close down the coal units at the plant. Doing so would save lives, and help build a cleaner future for us all.
