

We have a right to breathe clean air

Our concern

Julpiti Inc has applied for an air permit from the Texas Commission on Environmental Quality to build a new rock crushing facility located at approximately 8611 FM 521 Rd., Juliff, TX in Fort Bend County.

Learn more at tinyurl.com/cbp-airmail

Why should I be concerned?

Rock crushing facilities can emit the following air pollutants – This can worsen **asthma attacks** and **adverse heart outcomes** for vulnerable persons.

- Particulate Matter 2.5 (PM_{2.5})
- Carbon Monoxide

- Sulfur Dioxide
- Nitrogen Oxides

Share your story!

Submit comments directly to TCEQ by scanning this QR code and type **“174419”** into the permit number box.

Script / Sample Comment Below

“I live near (the facility name) and am stating my opposition to this permit being granted.

ADD YOUR PERSONAL TESTIMONY:

This can be about your health, your family’s health, and the impact on your quality of life

This facility emits health harming pollutants including:

- Particulate Matter 2.5 which can enter into the bloodstream and trigger asthmas (refer to air pollutants listed on the other side)
- Within 1 mile of the proposed facility there are:

> 600 homes

5 schools

3 parks

1 place of worship

I want TCEQ to prioritize my and the community's health. They have the power to stop this facility from exposing me and my neighborhood from air pollution and all of its negative health impacts.”
